BENJAMIN COLIMARD

DevOps Engineer

8 rue de l'Aire aux grains, Orvault, France | +33 6 18 20 30 71 | bcolimard@gmail.com

LinkedIn | GitHub | Date of Birth: 27 July 2003 | Birthplace: Bordeaux | Nationality: French

PROFESSIONAL SUMMARY

DevOps Engineer with 2 years of hands-on experience across internships and full-time roles, specializing in Linux automation, containerization, and CI/CD pipeline implementation. Proven ability to design and deliver automated solutions for environment provisioning, version upgrades, and pre-production validation. Strong foundation in both DevOps practices and full-stack development, with international project experience spanning France and Taiwan. Curious by nature, with a disciplined background in competitive baseball (16 hrs/week sport-study) and interests in chess and calisthenics.

EDUCATION

Epitech — Nantes, France | Diploma of Information Technology Expert & Title of Software Engineering Expert (RNCP Level 7) | 2021 – 2026

Chung Cheng University — Chiayi, Taiwan | Exchange Student (English-taught) — Coursework in programming and cybersecurity | 2024 – 2025

Lycée Saint Dominique — Saint-Herblain, France | Baccalauréat — Specialties: Digital & Computer Sciences, Mathematics — Honors: Fairly Good | 2021

Lycée Alfred Kastler — Talence, France | Sport-Study Program — Baseball

TECHNICAL SKILLS

DevOps & CI/CD	**Docker, Ansible, Jenkins, GitLab CI/CD**
Programming	TypeScript, Python, C, C++, BASH, Erlang, Elixir, Lisp
Frameworks	NestJS, React, React Native, VueJS
Tools & Platforms	Git, GitHub, GitLab, Vagrant, Trello, Nexus, Squash
Systems & Virtualization	Linux, VirtualBox, VMware Horizon
Databases	PostgreSQL, Supabase

PROFESSIONAL EXPERIENCE

DevOps Developer — *GROUPE SII | Nantes, France | Mar 2026 – Sep 2026*

- Designed and delivered an automated flow control platform to validate VM readiness before production deployment; solution validated by Tech Lead and approved by DASSA team.
- Automated Squash Autom installation under Docker across 3 VMs (PostgreSQL, Squash, Squash Autom), including inter-machine communication configuration.
- Automated Squash upgrade from v10 to v15 and Nexus upgrade from v3.78 to v3.94 in standalone and HA environments without service interruption.
- Configured Linux environments with Ansible; built and maintained Jenkins pipelines; managed source code with GitLab.

Technologies: Docker, Ansible, Jenkins, Linux, GitLab, PostgreSQL, Nexus, Squash

Fullstack Developer — *SIMUL'IMPACT | Nantes, France | Sep 2025 – Feb 2026*

- Improved the company's simulation tool by optimizing user experience and underlying algorithms; resolved bugs and enhanced product reliability.
- Developed a new module for public space requalification, including new impact indicators, currently commercially available.
- Developed in Erlang and Elixir on Linux; managed source code with GitHub and tasks with Trello.

Technologies: Erlang, Elixir, Linux, GitHub, Trello

Back-end Developer — *EPITECH — SaveToon | Taiwan (Remote) | Sep 2024 – Feb 2026*

- Designed and developed the API and web extension for a webtoon/manhwa aggregation platform with reading tracking and recommendation features.
- Set up CI/CD pipelines and containerized the application with Docker.
- Developed with TypeScript, NestJS, and React; collaborated with a distributed team of 5 developers across multiple time zones.

Technologies: Docker, TypeScript, NestJS, React, GitHub, CI/CD

Lisp Developer — *IUT Bordeaux | Bordeaux, France | Feb 2024 – May 2024*

- Developed an automation solution for VM management using VMware Horizon, enabling on-demand startup/shutdown to optimize resource usage and reduce energy costs.
- Reduced energy consumption and VM operating costs while ensuring availability for faculty needs.

Technologies: Lisp, VMware Horizon, GitHub

React Native Developer — *CHOUIC | Nantes, France | Sep 2022 – Dec 2022 | June 2023*

- Maintained and resolved bugs across company applications, improving reliability and user experience.
- Integrated an in-app communication solution allowing users to contact the support team directly, including in the LovBirdz application.

Technologies: React Native, GitHub, Trello

LANGUAGES

French	**Native (C2)**
English	Upper Intermediate (B2)
Mandarin	Beginner (A1)

HOBBIES & INTERESTS

- Baseball — former sport-study student in Bordeaux (16 hrs/week training); teamwork and discipline
- Chess — strategic thinking and problem-solving
- Calisthenics — physical training and self-discipline
- Video games
